OBJECTIVE

Computer Science undergraduate (AI/ML specialization, 2027 graduate) with production experience shipping REST APIs, full-stack applications, and cloud-deployed microservices. Strong CS fundamentals: TCP/IP networking, OS, Distributed Systems, DSA (450+ problems solved). Skilled in secure coding (OWASP/TDD), debugging, and test-driven development. Targeting Cisco Code with Cisco FY27 — Application Software or Networking Protocols track.

TECHNICAL SKILLS

Languages	Python, Java (OOP, SOLID), JavaScript / TypeScript, SQL, C++ (fundamentals), Go (familiar)
Networking & OS	TCP/IP, HTTP/HTTPS, REST, WebSockets, TLS/SSL, Routing & Switching concepts, Linux/Unix OS fundamentals
Security	OWASP secure coding, TLS, IPsec/VPN concepts, data-privacy principles, threat-vector awareness
Backend	Node.js / Express, FastAPI, REST APIs, Async Microservices, Redis, Celery, Docker
Frontend	React.js (Hooks, Context, Redux), Next.js, React Native, TypeScript, TailwindCSS
Cloud & DevOps	AWS (EC2, S3, Lambda, RDS), GCP, Docker, Kubernetes (basics), CI/CD, Grafana
CS Fundamentals	DSA (450+ problems), OOP Design, OS, Computer Networks, DBMS, Distributed Systems
Practices	Agile / Scrum, TDD, Unit Testing, Code Review, Debugging, Postmortem Analysis, Git

EXPERIENCE

Software Developer Intern — CODEXINTERN · Remote

Jul – Aug 2025

- Shipped 3 production features (Node.js/Express + React) — 8,000+ lines of reviewed code following SDLC, TDD, and OWASP secure-coding standards; collaborated on code reviews and communicated status/blockers in Agile/Scrum standups.
- Diagnosed and eliminated a production latency bottleneck through profiling, identifying hot SQL queries and blocking I/O, then implementing async Redis caching — reduced API latency 77% (420 ms → 95 ms) on a live microservice.

Full-Stack Developer (Production) — RIT Timetable Pro · Walwa

Jan 2025 – Present

- Architected React + Vite + TypeScript SPA (RBAC, conflict-detection, live updates) from Figma to production — 300+ daily users, zero-downtime deployments; built FastAPI backend with CI/CD and automated regression testing.

Technical Head — Engineering & AI — Matrix Mind Club, RIT · Walwa

Aug 2024 – Present

- Led 15-member team delivering AI-powered internal tools; deployed real-time dashboards (React + WebSockets) for 500+ concurrent users; shared learnings via technical documentation and code reviews.

PROJECTS

TenderIntel AI — Distributed Async Platform [\[GitHub\]](#) | Python · FastAPI · Redis · Celery · Docker · AWS · LangChain · Vertex AI

- Async pipeline processing 10,000+ records/day via distributed task queues (Celery + Redis) on AWS with automated health monitoring and OpenAPI contracts; RAG scoring engine (91% precision) — applied performance debugging to meet throughput SLAs.

LivestockAI — Production ML Microservice [\[GitHub\]](#) | Python · TensorFlow · FastAPI · React · MongoDB · Docker

- 94.2% accuracy 12-class classifier as REST microservice; sub-150 ms inference via model quantisation for 200+ DAU; automated test suites validating accuracy and latency SLAs, isolating model vs infrastructure regressions.

SmartPark — Real-Time Parking System, Pune [\[GitHub\]](#) | React · Node.js · PostgreSQL · REST APIs

- Full-stack real-time parking slot system — REST API backend, relational data model, UI with search/filter/multi-location status tracking; applied TCP/IP client-server principles throughout.

GoldenHour — AI Emergency Triage (MIT-WPU Hackathon) [\[GitHub\]](#) | React · FastAPI · Python

- Built emergency response workflow tool concept-to-live-demo in 24 hours — owned UI, core logic, and demo delivery; demonstrated rapid problem-solving under hard deadline.

Movie Recommendation System [\[GitHub\]](#) | Python · Machine Learning · OOP

- Content-based recommendation engine using similarity scoring over film metadata — personalised suggestions without collaborative user history; applied Python optimisation and clean OOP design.

EDUCATION

B.Tech CSE (AI/ML Specialisation) — 2027 Graduate

Aug 2023 – May 2027

Rajarambapu Institute of Technology, Sangli

Coursework: DSA, OOP, Operating Systems, Computer Networks, DBMS

ACHIEVEMENTS & CERTIFICATIONS

- 450+ DSA problems solved (arrays, trees, graphs, DP) — TCS CodeVita Season 13 Global Rank 2,754 / 300,000+ participants.
- Frontend Battle 2.0 Finalist — IIT Bhubaneswar (500+ participants); GirlScript Summer of Code — Top 5% contributor & mentor.
- Cisco IoT–NASSCOM Certified · Oracle SQL Certified Associate · Google SWE Fundamentals
